The Panel on the Future
of the Trent Severn Waterway
Peterborough, Ont
To Panel Members.

We have read about the review of
the Trent Severn Waterway, and the
draining of the lakes to supply it,
with great interest.

We have property on Farguhar Lake
in Haliburton County. Every year the
level of the lake drops in August and
September so that we can not even
get our boat out into the lake -
it is a drop of 5-6 feet. This destroys
the habitat for frogs and small fish. The
Beaver Lodge in the bay is out of the
water!! If we do anything to the
shoreline which interferes with this
habitat we are fined big time, so
why is this allowed to supply the
lower Trent Severn?

We have complained, as have others, for
several years. We hope now something
will be done about it.

Yours truly,
James & Klaus Edelman
Norwich, Ont.
